A3X

The smallest big sound ever...

With the A3X, ADAM Audio present their smallest monitor to date, making it perfectly suited for all environments where space is limited but sound shouldn't be constricted. The A3X combines a tiny footprint with the much acclaimed ADAM sound quality by using the X-ART tweeter for the higher frequencies, a guarantee for crystal clear music reproduction.

A 4.5" (basket) driver handles the lower registers. The diaphragm is made from carbon fiber, a material that is very light but very stiff and therefore capable of delivering colouring-free sound. Two built-in 25 Watt amplifiers powers each of the drivers directly.

Stereolink

A very handy and exclusive technology found in the two smaller AX monitors is the Stereolink. This is accomplished by a pair of additional RCA connections that allow for a bypass of the second stereo channel to the other speaker.

This new technology connects two A3X speakers in such a manner as to allow the user the option to control the overall stereo volume of the system from either speaker's gain control. This makes the A3X a natural for "mixer-less" desktop applications where overall system volume needs to be adjusted easily.

Desktop Stand

ADAM Audio also offers desktop stands that have been specifically designed to optimize the acoustics of the A3X when used in desktop applications and alike. The stands minimize reflections from the desktop and maximize the amount of direct sound.

Basic technical data at a glance

- X-ART tweeter
- 4.5" carbon fiber midwoofer
- 2 x 25W amplification
- on-/off-switch and volume gain on the front panel
- Stereolink
- tweeter gain on the rear panel
- 60Hz - 50kHz
- XLR & RCA connectors
- 106dB max peak SPL per pair
- 5 year warranty

Review Samples

"I've used various monitors for my computer work before, but never of the caliber of the A3X series. Before these, I would have to redo my mixes significantly when transitioning from the small cheapies to the big 'real ones'. The ADAM Audio A3X's save me a step by providing both great sound in a compact format and by changing mundane audio task-work into a quality listening experience. If you use good monitors from the outset, you'll learn your music that much faster so that when it comes time for mixdown and mastering on your big boxes, you'll already be acclimated to your song's subtler sonic aspects— aspects revealed only by the A3X's with their sweet, smooth top end, and impressive handling of bass frequencies. Highly recommended."

(Jon Chappell, Harmony Central, 03/10)

"ADAM's A3X as the smallest monitor with a X-ART tweeter to date has convinced us in every respect. It's one of the best compact monitors we have ever reviewed and with its almost shameless low price it's worth every penny." *(Professional Audio, 05/10)*
